Abstract of JP 2001231802 (A)

PROBLEM TO BE SOLVED: To provide the exudate storing equipment of a simple structure giving no uncomfortable feeling in wearing, and allowing the observation or treatment of a lesion of a human body simply by exposing it to the external environment at the necessary minimum. **SOLUTION:** The equipment comprises a face plate 1 to be attached on the lesion of the body surface and a bag body 6 fixed to a non skin side of the face plate 1. An opening 9 is provided at a position facing to the lesion in a wearing state on the opposite side to the face plate of the bag body 6, and the opening 9 is openable or closable with airtightly sealing fasteners 14, 15.
